Campus, Rajajinagar Extension, Malleshwaram (West),
Bangalore, Karnataka - 560055

To,

PRINCIPAL: JAIN INSTITUTE OF TECHNOLOGY

DAVANAGERE, KARNATAKA: 577003

Dear Sir/Madam,

Sub: Proposal to establish Industry 4.0 labs at JAIN INSTITUTE OF TECHNOLOGY

Warm Greetings from Ethnotech Academy. I hope this document finds you in good health and High spirits. The reason for this communication is the prospect of establishing a Centre of excellence at your reputed Institution under the IIOP project. IIOP is the abbreviation for Industry Institute outreach program. IIOP was envisioned to ensure that our Institutions are equipped to adopt and succeed in the new technological revolution famously known as Industry 4.0. Industry 4.0 is the new revolution encompassing technologies such as Block Chain, Automation, Virtualization, Data analytics etc. IIOP provides Institutions with state-of-the-art Infrastructure, Licensed technology software, Affiliations to global corporates such as Microsoft, Amazon, VMware, Cisco, IBM, Palo Alto and Tally. The best part being all these facilities and infrastructure is provided to AICTE approved institutions at no cost.

The Main Challenges faced by academic Institutions to implement these programs are follows:

1. No direct collaboration with Industry leaders for technology transfer and collaborations.

Solution: Ethnotech will facilitate the process of MOU signing between the Institution and the corporates. The affiliation cost and Software License cost will be completely paid by Ethnotech.

2. Lack/Absence of Industry prescribed Infrastructure in the campus to conduct these programs.

Solution: Ethnotech will establish state of the art Technology labs for the purpose of affiliation, training and certification.

3. Lack of experts in the Institution campus to conduct these programs.

Solution: Industry certified Instructors will visit the Institution to conduct the trainings and certification. Even the faculty members will be trained every semester on latest cutting-Edge Technologies.

4. High Cost of Global certifications.

Solution: Global Certifications such as CCNA, AWS, VMWare and others are exorbitantly expensive ranging anywhere between 18,000 to 40,000 INR. To ensure that students don't bear the brunt of financial burden, Ethnotech has subsidized the cost of training and certification by 80%.

5. Gap in connecting trained and certified students with corporates looking to hire.

Solution: Ethnotech will give complete access to IOP Learning management system cum Placement portal for all the students participating in the program. The portal will directly connect the Industries and students for Internship, Project and placement purpose.

The most important part of this exercise is that students and teachers undergoing these training will be certified directly by the corporates through globally recognized certifications. Detailed information about the program is attached along with this cover letter for your kind reference. We are confident that you will join us in effective implementation of this wonderful initiative. Hoping so,

Yours in Education.

Dr. Kiran.K. Rajanna

Chairman- Ethnotech Group.

Bangalore.

1 Industry Institute Outreach program (IIOP)

Industry Institute outreach Program is an initiative to introduce and familiarize educational institutions with the new Industry revolution famously known as Industry 4.0.

As we are all aware Industry 4.0 is a revolution in the technology domain. The technologies classified under Industry 4.0 are expected to generate 71% of all the new jobs in the next decade. Keeping this in mind, it is very important to ensure that our educational Institutions, students and faculties in particular are introduced to these technologies in a practical manner. However, most of our institutions do not have the infrastructure or the expertise in these technologies since most of these technologies are relatively new and quite expensive to adopt and implement.

Keeping these factors in mind, IIOP was envisioned to provide state of the art technology infrastructure to Institutions as well as experts to train faculty and students. The best part about the program is that participating institutions will collaborate with corporates that are leading in the technologies as academic partners. Not only this, the institution need not spend any money during any time of the MOU for any of these services which includes and not limited to:

1. State of the art technology labs. (Explained in detail in section 2.1)
2. Affiliations to 8 global leading corporates.
3. All the required licensed software's on these technologies.
4. Completely free training and certification to faculties on these technologies.
5. Training at very nominal cost to students and completely free global certification to students at no extra cost.
6. Full access to IIOP LMS (Learning Management system) which provides students with all required content as well as connect students to companies across the country for placements. (Explained in detail in section 1.5)

1.1 Technology & Affiliations

Cloud Computing	 
Virtualization	
Artificial Intelligence, Data Science Block Chain and analytics	
Automation	 
Web Services	
Design and Modelling	 
Internet of Things	 

2 Institution Benefits

2.1 Global Affiliations

In the modern era, it is very important that the institutions of higher education collaborate with corporates who are leaders in the respective technologies, this practice leads to preparing the students and faculty for ever changing demands of the market, keeping this in mind. Through the IIOF the participating institutions will directly sign MoUs with the corporates as explained in the table 1.1 above.

2.2 Centre of Excellence

In order to implement the latest cutting-edge Technology programs, it is necessary to have high performance computing labs. Through IIOF the participating institutions will be sponsored technology labs with the required infrastructure to create a state-of-the-Art facility.

2.3 Faculty Development Programs & Certification

An institution is only as good as its faculties. Ensuring that our faculties are equipped with the knowledge to impart these technology lessons is the main purpose of the IIOP program. During the tenure of this project the faculties will be trained directly by the industry experts every semester for 3 years at the sametime the complete certificate cost of the faculties will be sponsored through the IIOP project at no cost.

2.4 Software Licenses

Through IIOP the participating institution will be provided with all the required paid software licenses for the purpose of training, research and development. The cost of the software will be paid by Ethnotech Academy.

2.5 Learning Management System

The IIOP Learning management system (LMS) is one stop solution to all the needsof the students and faculties. Through the LMS students will be able to access free training, seminars, internship and projects. as and when students complete Global certifications, it directly communicated to more than 300 companies, we plan to make a part of job portal. Through the LMS the students will be able to create a video resume, download a professional resume in a click a button and also apply to hundreds of jobs. There is no cost involved in any of these services.

3 Student Benefits

3.1 Global Certification

As we are all well aware certificates from global corporates provides students with the skills and recognition required to obtain to succeed, however we are also aware that these training and certification are quite expensive and not within thereach of many students, Through IIOp we are ensuring that money is not a hurdle for the students to get trained and certified form these global corporates.

3.2 Technology Labs & Examination Centre

In order for students to learn and succeed in their field of interest, a supporting eco system is very necessary. Through IIOp students will have full timeand unconditional access to State of Art technology labs will all the necessary software's and equipment's required for Training, research and development. The best part about the program is that, the students need not search for an authorized training center after completion of the training program, every participating institution will be affiliated as an Authorized Training center to conduct global certification. this means students can take up their practice test and certificationexams in the comfort of their own institutions.

3.3 IIOp LMS

Through the IIOp Learning management System (LMS) students can create their own profiles by updating their information on the portal, The LMS also gives access to students about free seminars, free training, internship and industry project available across the country. through the LMS students can apply for jobsin a click of a button.

4 Ethnotech Contribution to the College

WORKSTATIONS

TABLES

CHAIRS

AIR CONDITIONER

CLASSROOM INTERIOR

PROJECTOR

CCTV

4.1 Paid Software Licenses Packages

Affiliation fees and Annual affiliation renewal fees of ₹ 4,80,000 + GST to be paid by Ethnotech Academy on behalf of the institution.

5. Equipment's used for Training

5.1 Texas Instrument Kits

Ti-ARM Board

TI - Launch pad

TI - Robotics Kit

TI - Robotic Kit 2

Speech Processing Development System

- OMAP-L137/TMS320C6747 Floating Point Starter Kit with multi channel Daughter Card.
- Lab view compatible Signal Ranger MK3 16- Channel DSP.
- TMS320C6748 DSP Development Kit (LCDK).
- TMS320C6713 DSP Starter Kit (DSK)

Vedio and Image Processing Development System

- DM6437 Digital Video Development Platform (DVDP).
- TMS320C6678LE Evaluation Module.
- Jacinto 6 Infotainment Evaluation Module Kit.
- TMS320C6748 DSP Development Kit (LCDK).

Wireless Research

- Wireless Open Access Research Platform (WARP)

Analog Design Kit

Sl no	Module	quantity
1	Analog Lab in Box with user manual and TI Breadboard	1
2	Analog System Design Kit with Accessories	1

Signal Processing Kit

Sl no	Module	quantity
1	TMS320C6748 DSP Development Kit with XDS100 v3 JTAG Emulator	1
2	OMAP L137 with Multichannel daughter card	1
